## CORPORATION

### A Message from the Leadership Team:

Amy Collucci, Senior Director Of Business Development

I joined the Dynanet team at the beginning of 2020 with the goal and mission of pursuing business opportunities in the Intelligence Community (IC) and at the Department of Defense. Although this has been a difficult year with Covid-19 restrictions, travel bans, and business closures, Dynanet has been able to construct an effective strategy to meet these challenges directly and forge ahead. Through this process, we have created partnerships and are actively pursuing opportunities for the future.

Dynanet prides itself on numerous successes in modernization of Federal Civilian Agencies. One of the common themes I noticed in the IC community is a lack of emphasis on modernization or change. My hope is to bring new ideas and technologies that will lead to increased efficiency and decrease costs associated with outdated procedures.

Over the past year, we have welcomed new members to our IC team. In the year ahead, we are looking forward to increasing these numbers. Our strengths and connections within the IC and DOD community, along with the exemplary performance of our personnel, trends towards a bright future for Dynanet.

### Dynanet Project Highlights

Over the past year, Dynanet has been supporting the United States Office of Personnel Management (OPM) with the development of Red Hat OpenShift Containerization environment. This technology will enable OPM's IT infrastructure to be more secure, resilient, and reliable. The OpenShift Container Platforms also allows for push-button, automatic platform updates, a consistent hybrid cloud foundation for building and scaling containerized applications, and a self-service environment, so developers have a consistent foundation for the entire codebase.

### Dynanet Employee Spotlight

In September 2017, Mandapati Raju joined Dynanet's CMS Common Working File Maintenance (CWFM) team as the Production Support Group (PSG) Manager. Mandapati has been recognized by CMS for his excellent job managing resolution of all questions and problems within contract action goals.

Mandapati has been instrumental in providing direction to the CWFM team in support of CMS COVID-19 urgent changes. Most of these urgent changes are delivered in just days of the CMS request. He provides bi-weekly status to CMS leadership. The CMS COR repeatedly thanks Mandapati and the extended CWFM team for the very quick turnaround on all COVID-19 requests.

In addition to effectively managing the user community, Mandapati is our "go to" person to provide technical insight to internal staff, answering questions and providing guidance on technical approaches. He supports the business analysts on EIC calls to determine if and how a CWF system is impacted. He continues to go above and beyond by volunteering to provide new hire orientation support to help bring them up to speed. He is the first to put aside his work and explain how the system works whether it be to a new hire or a customer at CMS. Mandapati is vital to the continued success of CMS CWF legacy system.

*Referral Bonus: As a reminder to Dynanet employees, referrals are both appreciated and compensated.*

### Upcoming

#### servicenow

Dynanet is in the process of creating a corporate-wide ServiceNow Practice Area. If you are interested in getting certified in ServiceNow for free, please reach out to Dynanet CTO, Peter Anih ([panih@dynanetcorp.com](mailto:panih@dynanetcorp.com)) for more information.

Your voice matters. Dynanet is participating in two employee engagement efforts. **The 2021 Inc. Best Workplaces to award excellence in company culture and The Washington Post's 2021 Top Workplaces.** Surveys from INC's Best Workplaces (via Quantum Research) have already been sent to you via email. The Washington Post will deliver the Top Workplaces survey in mid-January. Please take the time to respond to both surveys. The feedback that you provide is valuable to Dynanet to make improvements to increase employee engagement, attract and retain top talent, and transform our culture.
