CORPORATION

A Message from the Leadership Team: Sean Peay, CEO

The start of the 2022 Fiscal Year is bringing many great opportunities to Dynanet. We are expanding our service offerings to agencies such as the Health and Human Services, Centers for Medicare and Medicaid and Office of Personnel Management. Our current customers continue to ask us to do more because we are a trusted resource, we get the job done and help our customers achieve their missions. We are focusing on all aspects of business growth - quality, customer satisfaction and employee development. In support of our goals, we have renewed the CMMI® ML5 rating of our software development projects in the world's first sustainment appraisal. You can read more about this and our other successes below.

Dynanet Project Highlights

Dynanet successfully renewed the Capability Maturity Model Integration (CMMI)® Maturity Level (ML) 5 rating of its software development projects in the world's first sustainment appraisal. The ISACA CMMI Institute confirmed the appraisal team's findings that Dynanet continues to implement and institutionalize processes based on the best practices defined in version 2.0 of the model. In 2019, Dynanet was one of the first organizations in the world to receive a ML5 rating in a benchmark appraisal after adopting the V2.0 model. According to Sean Peay, Dynanet CEO and President, "This renewal affirms what our customers already know, that we do great work with great results, enabling them to better serve U.S. citizens and other stakeholders. Having held ISO certifications and CMMI ratings since 2009, we are committed to continuously improve the way we do business to benefit our customers." Dynanet's Director of Process Improvement, Mike McEwen, added that "This rare achievement means our practices have received the highest form of third-party validation and demonstrates our relentless pursuit of high performance." The Software Quality Center (SQC), an ISACA Licensed Premium CMMI Partner with a history of over 22 years, led the recent appraisal.

Dynanet Employee Spotlight

Mike McEwen has spent almost half of his 35+ years as an IT professional helping Dynanet deliver high-quality software to the federal government. He joined Dynanet in 2005 to lead our custom software development work at the U.S. Food and Drug Administration. There, he grew Dynanet's footprint to over 50 people, accepted several customer awards on behalf of the team, and helped establish the agency's first agile projects. He also put Dynanet on a path of process improvement by securing our first ISO 9001 (quality) certification and Capability Maturity Model Integration (CMMI) rating in 2009. He has contributed to quality audits and appraisals ever since, helping Dynanet receive a CMMI Maturity Level 5 rating in 2019, gain ISO 20000 (IT service management) and 27001 (information system security) certifications in 2021, and recently complete the world's first sustainment appraisal to renew our Maturity Level 5 rating. Besides overseeing these initiatives as corporate Director of Process Improvement, Mike also serves as Quality Assurance Manager on the Common Working File Maintenance (CWFM) team at the Centers for Medicare and Medicaid Services (CMS). In that role, he helps the team plan and execute its quality management plan, which includes process training, procedure documentation updates, quality audits and reviews, performance monitoring with quantitative techniques, root cause analysis, and implementation of corrective actions and improvements.

Job Openings

ServiceNow Developer

SharePoint Developer

Sr. Cyber Security Specialist
