DYNANET

DYNANET'S MISSION
Provide System Integration Services Focused on our Public and Private Customer's Mission that Solves Complex Business Problems.

DYNANET CORPORATE GOALS
Provide a dynamic and challenging environment as the employer of choice.

Ensure customer satisfaction through the delivery of quality people, services, and products.

Anticipate customer's needs through the use of innovative and cutting-edge approaches and solutions.

Be a socially responsible company.

Be a trusted business partner.

Message from Sean Peay, Dynanet CEO

With the start of the fiscal year, we have many new initiatives under way to support our corporate goals. To help us move those initaitives forward, we are focusing on both the technology and people side of our business. On the technology side, Dynanet is continuing to pursue higher CMMI certifications and we were recently recognized as the First U.S. company to receive CMMI Version 2.0 upgrade training. On the people side, our employees are receiving highly sought after certifications, such as blockchain certification. Our employees are continuing to provide excellent customer service as evidenced by kudos from OPM. You can read more about these initiatives below. I am excited about Dynanet's future and the work we do in support of our customers and community.

Corporate News

Dynanet Wins NASA Contract
October 2018
Dynanet was awarded a Prime contract by the National Aeronautics and Space Administration (NASA) to support the Office of the Chief Information Officer (OCIO). Dynanet will be developing strategies and policies to enable the alignment of the NASA OCIO IT Portfolio vision with the mission needs of the 10 NASA Centers. Dynanet will also be reviewing manual processes and apply Robotics Process Automation (RPA) solutions to automate them.

Dynanet's NASA team is under the executive guidance of Dynanet's CTO, Peter Anih. The Dynanet Lead for the NASA Project is Senior Enterprise Architect Ana Lombera. The additional members of the Dynanet NASA Team are John Barberio, Uzoma Kanu, Vitale Onoh, and Michael Kuhlman. Peter and the team are currently working with the NASA customer to add additional resources and support to NASA OCIO.

Dynanet Continues Process Excellence Journey with CMMI®V2.0
September 2018

On September 21, several members of Dynanet's quality team completed one of the first U.S. offerings of the Capability Maturity Model Integration (CMMI®) Version 2.0 Upgrade Training. The training, delivered by CMMI® Institute partner, Software Quality Center (SQC), enables members of Dynanet's previous appraisal teams to serve on future ones after the old version of the model is retired in 2020. The training also gives quality team members an understanding of the new Version 2.0 CMMI® Development Model (CMMI®-DEV), which Dynanet will begin following in early 2019 as an early adopter.

The new version of CMMI®-DEV is a significant upgrade of the CMMI® product suite. It includes a better-organized model of best practices, new appraisal method, improved training and certification, more robust systems and tools, and adoption guidance to help organizations transition to the new model. The CMMI® Institute has simplified the language to make it easier to understand and apply. According to SQC CEO and founder, Kris Puthucode, "The new model also focuses more on organizational performance improvement rather than just compliance, and promises to be more cost-effective to implement, appraise and sustain, thus making the total cost of ownership significantly lower."

SQC met with quality team members and senior management before the upgrade training to kick off Dynanet's latest process excellence initiative to achieve a Maturity Level 4 rating in 2019. The kick-off meeting and follow-up session presented the concepts of higher-process maturity including advanced measurement, statistical analysis techniques, and performance prediction models.

DYNANET NEWS
CORPORATION

SQC will be helping Dynanet over the next 12 months to identify performance improvement opportunities, develop statistical models for predicting expected outcomes, and establish the infrastructure needed to keep the models aligned with corporate business objectives.

CMMI® is a process improvement framework used by the best companies of all sizes across many industries. In 2017, all 5 "Fortune World's Most Admired Companies" had at least one organizational unit with an active CMMI® rating and the Fortune #1 or #2 company in 10 different industries used CMMI®. Over 10,000 organizations in 106 countries have used CMMI® to improve their capabilities and performance.

Dynanet Partners with Red Hat to Fill Federal Job Opportunities
December 2018

Dynanet is partnering with Red Hat to provide key resources for federal government jobs throughout the region. We have been working with Red Hat and their suite of products for several years. Red Hat is a technology solutions leader that continues to significantly increase their presence within the federal government. A component of Dynanet's corporate strategy is to identify and partner with cutting edge and industry leading technology solution providers like Red Hat. If you are interested in finding out more about this partnership, please contact Michael Gaffney at mgaffney@dynanetcorp.com.

Blockchain Certification
Winter 2018

Mo Rajraji, Dynanet Senior Director of Technology, holds two certificates: Blockchain Strategy from the University of Oxford and Blockchain Certified Consultant from the Government Blockchain Association (GBA). The certifications have augmented Dynanet's capabilities to adopt Blockchain technology while shaping our strategic framework and ecosystem map. The certifications also provide a means to understand the intricacies of the technology and how it will affect the future of our partners and customers.

Government Shutdown Doesn't Shutdown Dynanet
January 2018

Dynanet's NASA contractors were busy working during the recent Federal Government shutdown.

Peter Anih, CTO, Elected ACT-IAC NexUS Executive Industry Vice Chair
Winter 2018

Dynanet's CTO, Peter Anih, was elected ACT-IAC NexUS Executive Industry Vice Chair. The ACT-IAC NexUS community is built on the mission of "Building the Next Generation of U.S. Leaders" to empower rising technology leaders to navigate industry and career specific challenges and opportunities. NexUS is designed with a focus on collaboration around the latest trends shaping the government of the future, learning from key government and industry executives, and working together as a powerful community to drive positive change within the federal landscape. The American Council for Technology-Industry Advisory Council (ACT-IAC) was established to improve government through the effective and innovative application of technology.   ACT-IAC provides an objective, trusted and ethical forum where government and industry executives can communicate, collaborate and learn.

Employee News

OPM Recognizes Dynanet's Marti Morano
October 2018

OPM's NBIB Senior Program Analyst recognized Dynanet's Marti Morano for her excellent customer support for OPM's IRS project. Marti provided invaluable support as a project management SME. She ensured the project ran smoothly and saw things through to completion and success. Marti supported the collection of user stories and applied her knowledge in Agile development to execute and to coach those involved in the project. Marti also provided a great deal of support with project scheduling leveraging models in Microsoft Project. This is critical as a project schedule is the heart that continuously pumps life through a project and keeps it alive.

In an email to Dynanet's Program Manager, OPM stated, "*Aside from her professional attributes, Marti is a genuine and caring individual. She is passionate about what she does and compassionate toward those she does it with. Thank you for placing her in a position to support such efforts.*"

Dynanet's Board of Advisors
October 2018

Edward O'Hare joins Dynanet Corporation Board of Advisors. Mr. O'Hare has more than 40 years' experience as senior executive with a record of success in the Federal Government and private sector. He has demonstrated ability to consult, lead and manage all aspects of large and small businesses, grow revenue and lead profitable delivery of a full range of products and services to customers.

After service in the U.S. Army, Mr. O'Hare began a long career in both the public and private sectors. His positions include Assistant Commissioner for the Integrated Technology Services at the General Services Administration (GSA) where Mr. O'Hare managed GSA IT and telecommunications contracts, which totaled more than $22 billion a year. He also served as the CIO for GSA's Federal Supply Service and the Federal Acquisition Services. In the private sector, Mr. O'Hare worked with several government consulting contractors, including as vice president of business development for Dynanet Corporation.

Gloria Parker, CEO and Senior Partner of Parker Group Consulting, joins Dynanet Corporation Board of Advisors. Ms. Parker advises major companies from large integrators, to consulting firms and small businesses on government and business strategies. She also works with Federal Government Agencies on executive management issues. Ms. Parker served as the Department of Housing and Urban Development's (HUD's) first Chief Technology Officer (CTO) and served as HUD's first Chief Information Officer (CIO). She was a charter member of the Federal CIO Council and a former Co-chair, IT Workforce Committee of the Federal CIO Council. Ms. Parker is past president of AFFIRM and currently serves as one of its two directors. She is a Fellow in the Council for Excellence in Government, a member of the CIO SAGE (Senior Advisor to Government Executives) Partnership for Public Service program. Dynanet's advisory board is comprised of former senior federal government officials and industry partners that have a long history of improving the IT processes in the federal market place. The members of the board will bring this IT knowledge and expertise to Dynanet, Dynanet customers and industry partners.

Employee Referral Bonus Program

As a reminder to Dynanet employees, referrals are both appreciated and compensated. Please go to www.dynanetcorp.com and click on the Careers tab for more information on the Employee Referral Bonus Program and to view the open positions. You may also direct candidates to our website to apply online.

Employee Profile

Michael Gaffney, Senior Director for Emerging Technologies & Business Development

Michael Gaffney recently joined Dynanet's Business Development team as a Senior Director for Emerging Technologies and Business Development. He has hit the ground running and is cultivating relationships with NASA, OPM, FDA, and DHS and strategic partners. Michael is also spearheading Dynanet's Red Hat Initiative (see news item above). If you subscribe to LinkedIn, you've seen the numerous job postings looking for team members to join our Red Hat team. Prior to joining Dynanet, Michael served 10 honorable years in the United States Army as an Intelligence Analyst. He was deployed to Afghanistan and Iraq where invaluable leadership, organizational, and operational skills were cultivated. He currently leverages these same skills at Dynanet Corporation. Michael also served as the Director of Business Development for EDC Consulting and McLane Advanced Technologies, Managing Director of Gaffney Strategic Solutions supporting Worldgate, LLC, and Business Smart Ops. Michael resides in Northern Virginia with his wife and three children and enjoys spending time with his family and playing golf.

ABOUT DYNANET

Dynanet Corporation has a long history of successfully assisting federal and state governments in accomplishment of their missions. The proof of our success is in the numerous commendations and awards we have been given and the list of partners who choose Dynanet as a business team member. A highly experienced and senior leadership team with both private sector and federal experience leads our talented and certified professionals.
